## Professional Summary

Second-year Computer Science undergraduate with strong proficiency in **Python and Java**, and hands-on experience in **Full Stack Web Development** using **HTML, CSS, JavaScript, and React**. Solid understanding of **Object-Oriented Programming and problem-solving techniques**, gained through academic coursework and practical projects. Actively building scalable, user-focused applications and seeking **software development or technology consulting internships** to apply technical skills in real-world environments.

## Education

### B.TECH(Computer Science & Engineering)

*Institute of Technical Education and Research, SOA*

CPGA- 8.59

09/2024 – Present | Bhubaneswar, India

### 12th

*St. Karen's High School*

Secured 84.16% Marks

2020 – 2022 | Patna, India

### 10th

*St. Karen's High School*

Secured 91.16% Marks

2020 | Patna, India

## Projects

### Portfolio Website

*Technologies: React, JQuery, Bootstrap, CSS, HTML*

- Designed and developed a **responsive personal portfolio website** to showcase projects, certifications, and technical skills.
- Implemented **component-based architecture** using React to improve maintainability and code reusability.
- Optimized user experience through **smooth navigation, event-driven interactions, and modern UI styling**.
- Applied best practices in front-end development to ensure cross-device compatibility and performance optimization.

11/2025 – Present

### Hangman – Word Guessing Game (Python)

*Technologies: Python*

- Developed a **console-based Hangman game** using **object-oriented programming principles** such as encapsulation and modularity.
- Designed structured classes to manage **game state, user input validation, and word selection logic**.
- Implemented efficient tracking of guesses and remaining attempts using Python data structures.
- Improved code readability and scalability by separating game logic from execution flow.

## Skill Set

Languages: Java, Python, SQL, HTML, CSS, JS

Database: SQL, DBMS

Tools: VS Code, IntelliJ IDEA, Eclipse

Soft Skills: Accountability, Adaptability, Leadership

## Certificates

- JAVA
- Python for Data Science, AI & Development
- Deloitte Data Analytics
- Front-End Apps with React
- Python Crash Course
- Deloitte Technology Certificate
- Deloitte Cyber Security
